
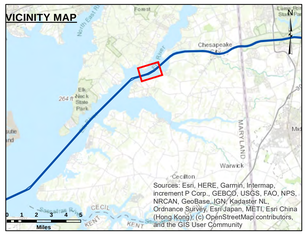
VICINITY MAP



1. THIS SURVEY MEETS STANDARDS AS OUTLINED IN CORPS OF ENGINEERS' HYDROGRAPHIC SURVEY MANUAL EM1110-2-1003, DATED NOVEMBER 30, 2013 FOR NAVIGATION AND DREDGING SUPPORT SURVEYS.

2. HORIZONTAL REFERENCE - NAD 83, MARYLAND STATE PLANE, ZONE 1900, U.S. FOOT.

3. VERTICAL REFERENCE – MEAN LOWER LOW WATER, WHICH IS BELOW N.A.V.D. 88 BY THE FOLLOWING:
1.35' FROM STA. 99+000 TO STA. 101+078.77
1.28' FROM STA. 101+078.77 TO STA. 109+879.2
1.22' FROM STA. 109+879.2 TO STA. 113+000

4. GEOID 12B AND NOAA TIDAL EPOCH: 1983 – 2001 WERE USED. SOUNDINGS ARE EXPRESSED IN FEET AND TENTHS AND REFER TO MEAN LOWER LOW WATER.

5. SOUNDINGS WERE SELECTED FOR PLOTTING PURPOSES ONLY, USING THE MINIMUM DEPTH WITHIN A 30'X30' CELL SHIFTED TO THE CELL CENTER.

6. CONTOURS DEPICT ACTUAL LOCATION OF BATHYMETRY AND DO NOT NECESSARILY REFLECT PLOTTED SOUNDING LOCATIONS.

7. CONTOURS WERE GENERATED USING THE MINIMUM DEPTH WITHIN A 15'X15' CELL.

8. HYPACK, INC. SOFTWARE WAS USED TO PERFORM THE SOUNDING SELECTION AND CONTOUR GENERATION.

9. THE INFORMATION DEPICTED ON THIS MAP REPRESENT THE RESULTS OF SURVEYS MADE ON THE DATES INDICATED AND CAN ONLY BE CONSIDERED AS INDICATING THE GENERAL CONDITIONS EXISTING AT THAT TIME.

10. THE POSITIONS OF THE AIDS TO NAVIGATION ARE PROVIDED FOR INFORMATION ONLY, AND SHOULD NOT BE USED FOR NAVIGATION.

11. THE LIMITS OF THE FEDERAL CHANNEL DEPICT THE MOST CURRENT CHANNEL FRAMEWORK AVAILABLE WHICH CAN ALSO BE DOWNLOADED HERE:
http://navigation.usace.army.mil/Survey/Framework

12. BASE MAPPING LINEWORK OR ORTHOPHOTOGRAPHY HAS BEEN COMPILED FROM A VARIETY OF SOURCES AND DATES AND IS INTENDED TO PORTRAY GENERAL CHARACTERISTIC SOF THE SHORELINE AND OTHER FEATURES. TEMPORAL CHANGES MAY HAVE OCCURRED SINCE THIS DATA SET WAS COLLECTED AND SOME PARTS OF THE DATA MAY NO LONGER BE AN ACCURATE REPRESENTATION OF THE SURFACE CONDITIONS.

DISCLAIMER
This chart is provided for general information only. It is not intended for use as a navigation aid. NOAA/US Army Corps of Engineers makes no warranties as to the suitability of this data for navigation by mariners. Any navigational use of this data is at the user's own risk. Although hydrographic surveys are conducted to high standards and all known hazards within the limitations of the survey equipment, conditions, and survey techniques are charted, hydrographic surveys are not a complete search for all bottom features. Wind, waves, currents, and other marine conditions may cause shoaling between surveys. Mariners and other users of the United States Survey equipment and techniques are encouraged to report any significant differences they find between their vessel's echo sounder readings and the charted depths. In areas where only a single source of data is available, we cannot assure that all features on the bottom have been detected.

The materials are provided "as is." The government makes no warranties, expressed or implied, about the quality or suitability of the materials, including but not limited to any implied warranties of merchantability, or fitness for a particular purpose, or non-infringement. The government does not warrant that the materials are free from representations as to the truth, accuracy, errors or omissions, or that the materials are without defect.

The government disclaims any liability for the use of this data by others and the government shall not be liable for any damages incurred as a result of or in connection with the data, or arising from omissions or errors therein.
