

**US Army Corps  
of Engineers®**  
Philadelphia District

**PROJECT FACTSHEET**

**Delaware Bay Coastline, DE & NJ  
Reeds Beach and Pierces Point, NJ**

October 2008

**CONGRESSIONAL DISTRICTS:** Reps. LoBiondo (NJ-2)

**APPROPRIATION / PHASE:**  
Construction, General

**BUSINESS PROGRAM:**  
Ecosystem Restoration

**AUTHORITY:** The Reeds Beach and Pierces Point project was authorized for construction by Title I, Section 101 (b) (6) of WRDA 1999.

**LOCATION:** The project area is located within Middle Township, Cape May County along the Delaware Bay Coastline at Reeds Beach and Pierces Point, New Jersey.

**DESCRIPTION:** The plan for the purpose of ecosystem restoration at Reeds Beach and Pierces Point is an 80-foot wide berm at an elevation of +5.5 feet NAVD over a project length of 6,800 feet. The plan entails a one-time placement of sand for horseshoe crab and shorebird habitat. The estimated initial project cost is \$3.9 million.

**STATUS:** With the FY 2006 funds a Limited Reevaluation Report (LRR) which updates costs and shows continued project viability was completed in July 2006. FY 2006 funds were also used to develop a Draft Project Partnership Agreement. This project did not receive any funding in FY 07 and 08. The initiation of initial construction is dependent on the establishment of an adequate funding stream. The next steps toward initial construction once adequate funding is received is to approve and execute the Project Partnership Agreement; acquire the necessary real estate; complete plans and specifications; and advertise and award the construction contract. To date, the FY 09 budget has not been approved. If this project receives additional funding in FY 09, project tasks will be determined based on the level of funding.

<b>TIMELINE</b>	<b>Start</b>	<b>Complete</b>	<b>Comments</b>
Initial Construction	TBD	TBD	Dependent on adequate funding
