

**US Army Corps
of Engineers**
Philadelphia District

PROJECT FACTSHEET

**Delaware Bay Coastline, DE & NJ
Villas and Vicinity, NJ**

October 2008

CONGRESSIONAL DISTRICTS: Rep. LoBiondo (NJ-2)

APPROPRIATION / PHASE:
Construction, General

BUSINESS PROGRAM:
Ecosystem Restoration

AUTHORITY: Title I, Section 101 (a) (14) of WRDA 1999.

LOCATION: The project area is located within Middle and Lower Townships, Cape May County along the Delaware Bay Coastline in New Jersey.

DESCRIPTION: The plan for the purpose of ecosystem restoration at Villas and vicinity is an 80-foot wide berm over a project length of 29,000 feet. The plan entails a one-time placement of sand for horseshoe crab and shorebird habitat. The estimated initial project cost is \$7.2 million.

STATUS: FY04 funds were added to initiate construction. FY06 funds were used to continue the Limited Reevaluation Report (LRR) which updates costs and shows continued project viability. The initiation of initial construction is dependent on the establishment of an adequate funding stream. The next steps toward initial construction once adequate funding is received is to complete the LRR; develop, approve and execute the Project Partnership Agreement; acquire the necessary real estate; complete plans and specifications; and advertise and award the construction contract. To date, the FY 09 budget has not been approved. If this project receives additional funding in FY 09, project tasks will be determined based on the level of funding.

TIMELINE	Start	Complete	Comments
Initial Construction	TBD	TBD	Dependent on adequate funding
