PUBLIC NOTICE FOR FEDERAL REGISTER NOTICE ANNOUNCING NEW NATIONWIDE PERMITS

On March 12, 2007, in Part II of the *Federal Register* (72 FR 11092), the U.S. Army Corps of Engineers (Corps) announced the reissuance of all existing Nationwide Permits (NWP), general conditions, and definitions with some modifications. The Corps has also issued six new NWPs, two new general conditions, and 13 new definitions. The NWPs became effective on March 19, 2007.

After the publication of this *Federal Register* notice, Corps districts will begin finalizing their regional conditions for the new and reissued NWPs. Regional conditions will provide additional protection for the aquatic environment, by ensuring that the NWPs authorize only those activities with minimal adverse effects on the aquatic environment. Regional conditions will help ensure protection of high value waters within the District. The Philadelphia District has the lead responsibility for the development of regional conditions for the States of Delaware and New Jersey. The Baltimore District has the lead responsibility for the development of regional conditions that would be applicable in the Commonwealth of Pennsylvania.

The publication of this *Federal Register* notice also begins the 60-day period for states, Indian Tribes, and the Environmental Protection Agency (EPA) to complete their water quality certification (WQC) process for the NWPs. This *Federal Register* notice also provides a 60-day period for coastal states to complete their Coastal Zone Management Act (CZMA) consistency determination processes. This 60-day period will end on May 11, 2007.

While the states, Indian Tribes, and EPA complete their WQC processes, the use of an NWP to authorize a discharge into waters of the United States is contingent upon obtaining individual water quality certification or a case-specific WQC waiver. Likewise, while states complete their CZMA consistency determination processes, the use of an NWP to authorize an activity within, or outside, a state's coastal zone that will affect land or water uses or natural resources of that state's coastal zone, is contingent upon obtaining an individual CZMA consistency determination, or a case-specific presumption of CZMA concurrence.

The March 12, 2007, *Federal Register* notice is available for viewing at the Philadelphia District Homepage at <http://www.nap.usace.army.mil/cenap-op/regulatory/regulatory.htm> or on the Internet at http://www.usace.army.mil/cw/cecwo/reg/nwp/nwp_2007_final.pdf. As an alternate, World Wide Web users can access the *Federal Register* through the U.S. Government Printing Office at <http://www.gpoaccess.gov/fr/index.html>.

The Corps has also issued final decision documents for the new and reissued NWP's. These documents are also available on the Internet at http://www.usace.army.mil/cw/cecwo/reg/nwp/nwp_final.htm and Corps district offices. Furthermore, the NWP decision documents will be supplemented by Division Engineers to address decisions concerning regional conditioning of the NWP's.

Additional information concerning the nationwide permits and regional conditions within the States of Delaware and New Jersey can be obtained by contacting Mr. Edward Bonner at (215) 656-5932, by writing to the Philadelphia District at the address listed above, or by reviewing the Philadelphia District Internet Home Page at: <http://www.nap.usace.army.mil/cenap-op/regulatory/regulatory.htm>
