ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite):

1. The 126 acre site is an active agriculture field with woodlands located along the periphery. There are three jurisdictional wetland areas totaling ??? acres and four non-jurisdictional wetland depression located entirely within the property.
2. All three jurisdictional wetlands are located adjacent to and contiguous with Tidbury Creek which is a tributary to the Saint Jones River, a tidal navigable water of the United States. The three non-jurisdictional wetland depressions are isolated with no surface water connection to waters of the United States. The depressions are surrounded by well drained upland soils.
3. From 33 CFR 328.3 (a) the following commerce determinations have been made in regard to the three non-jurisdiction wetland depressions: a) They are not tidal; b) They are not interstate waters, but are located entirely within the state of Delaware; c) They are not interstate waters that the use, degradation, or destruction of which could effect interstate or foreign commerce; d) They can not be used by interstate or foreign travelers for recreation or other purposes as the property is private; e) They could not be used for the harvesting or selling of fish or shellfish in interstate or foreign commerce; f) They could not be used for industrial purposes by industries in interstate commerce; g) They are not impoundments of waters describe above; h) They are not a tributary to waters of the U.S.; and i) They are not a part of the territorial seas.

In regard to navigation, it has been determined that the areas are depressions surrounded by upland located hundreds of linear feet from waters of the United States.

4. There are three area of jurisdiction totaling ???? acres located adjacent to Tidbury Creek which is a tributary to the Saint Jones River, a tidal navigable water of the United States. These areas are regulated pursuant to Section 404 of the Clean Water Act @ 33 CFR 328.3 (a)(5) & (a)(7).

Note: Acreages are estimates.
