ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite):

The site is 12.57 acres in size and is entirely forested.

There are several isolated wetland depressions on the site. Cumulatively the wetland depressions are 1.75 acres in size, the largest being 0.62 acre and the smallest 0.01 acre. The depressions are non-navigable, intrastate, isolated wetlands. Each wetland is small in size, closed in nature, and has insufficient hydrology to support navigation. There is no evidence that the isolated wetlands are or could be used for interstate or foreign commercial purposes. The isolated wetlands have no surface water connections to other waters of the United States.

The site does not contain waters of the United States.
