¹Check appropriate boxes that best describe potential for applicability of the Migratory Bird Rule to apply to onsite, non-jurisdictional, isolated, non-navigable, intra-state aquatic resource area.

TYPE OF DETERMINATION: Preliminary Or Approved

ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite):

The site contains existing commercial properties, parking lots, roadways, a detention basin, and one open lot (mostly upland mowed lawn). The site is surrounded by housing developments and other commercial buildings. The isolated wetlands are two small low spots within the upland lot that pond water.

The isolated wetlands (0.07 acres) exist a minimum of 2,000 to 3,000 linear feet from any tributary, and are not hydrologically connected to any tributary. The wetlands in question do not have any biological, chemical, or habitat relationships to a tributary/waters of the U.S., and were not considered adjacent to any watercourse (neighboring.)

As noted, the wetlands are not navigable in-fact (heavily vegetated, and has no permanent ponding of water), and has no potential for Interstate or Foreign Commerce (cannot be used by interstate or foreign travelers for recreation or other purposes, no fish or shellfish could be taken and sold in Interstate or Foreign Commerce, and not used for industrial purposes in Interstate Commerce). Therefore, the wetlands are isolated, intrastate wetlands with no nexus to interstate or foreign commerce. As such, the wetlands are not Waters of the United States, pursuant to 33 CFR Part 328.3, and not subject to Section 404 of the Clean Water

No Federally regulated Waters or Wetlands exist on the property.
