¹Check appropriate boxes that best describe potential for applicability of the Migratory Bird Rule to apply to onsite, non-jurisdictional, isolated, non-navigable, intra-state aquatic resource area.

TYPE OF DETERMINATION: Preliminary Or Approved

ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite):

The site contains fallow upland pasture, mowed upland pasture and lawns, existing buildings, upland woods, four unnamed perennial tributaries to Crum Creek with adjacent Palustrine forested, scrub/shrub and emergent wetlands, and an isolated wetland.

The isolated wetland (0.038 acres) exists around 100 linear feet from the main unnamed tributary, but out of the 100 year flood plain on the site. The wetland in question, at the time of the site inspection, did not have any hydrological, biological, chemical, or habitat relationships to the unnamed tributary, and therefore was not considered adjacent to the watercourse (neighboring.)

As noted, the wetland has no potential for navigation (too small, vegetated, and has no permanent ponding of water), and has no potential for Interstate or Foreign Commerce (cannot be used by interstate or foreign travelers for recreation or other purposes, no fish or shellfish could be taken and sold in Interstate or Foreign Commerce, and not used for industrial purposes in Interstate Commerce). Therefore, the wetland is an isolated, intrastate wetland with no nexus to interstate or foreign commerce. As such, the wetland is not a Waters of the United States, pursuant to 33 CFR Part 328.3, and not subject to Section 404 of the Clean Water Act.

See enclosure 1 (Jurisdictional Determination Checklist) for information concerning the Federally regulated waters and wetlands on the site.
