¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

III. SUPPORTING INFORMATION

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

Information submitted by, or on behalf of, the applicant/consultant: [Title\(s\) and date\(s\)](#)
This information **Select**, sufficient for purposes of this AJD.
Rationale: [N/A or describe rationale for insufficiency \(including partial insufficiency\)](#).

Data sheets prepared by the Corps: Prepared by Michael P. Leggiero, Biologist, S&E Section on 9/11/20 and 9/24/20.

Photographs: [Other: Taken on site on 9/11/20 and 9/24/20 and Google Earth imagery dated 4/17/16](#).

Corps site visit(s) conducted on: [9/11/20, 9/24/20 and 10/7/20](#).

Previous Jurisdictional Determinations (AJDs or PJDs): [ORM Number\(s\) and date\(s\)](#).

Antecedent Precipitation Tool: [provide detailed discussion in Section III.B.](#)

USDA NRCS Soil Survey: [Title\(s\) and/or date\(s\)](#).

USFWS NWI maps: [Title\(s\) and/or date\(s\)](#).

USGS topographic maps: [Title\(s\) and/or date\(s\)](#).

Other data sources used to aid in this determination:

Data Source (select)	Name and/or date and other relevant information
USGS Sources	N/A.
USDA Sources	N/A.
NOAA Sources	N/A.
USACE Sources	N/A.
State/Local/Tribal Sources	N/A.
Other Sources	N/A.

B. Typical year assessment(s): Based on the use of the Corps' Antecedent Precipitation Tool, the date during which the site was investigated has been determined to be a "typical year" based on 30 years of precipitation data. The site score was a 13, when a score of 10-14 is viewed as a normal year for precipitation. A score below 10 is considered to be drier than normal. A score above 14 is considered to be wetter than normal.

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

C. Additional comments to support AJD: This JD is associated with the investigation of alleged unauthorized work. This JD is limited just to the area of the investigation, e.g., areas of recent earthwork. Other waters and wetlands may be present on the property outside the area of investigation that were not reviewed and their jurisdictional status was not determined.
