

Investigations into Drinking water Solutions

Pearce Creek
Communities Meeting
March 16, 2013

Dave Blazer
Maryland Port
Administration

Drinking Water Alternatives

- Investigations to include:
 - Feasibility,
 - Effectiveness (level of treatment),
 - Affordability – capital costs and operational and maintenance costs,
 - Dependability,
 - Current systems, numbers of dwelling units and parcels, space requirements, existing plumbing and discharges
 - Zoning.

Investigate Options or combination of Options

- Drill deeper wells into the upper Patapsco deep aquifer
- Individual Filtration systems (whole house or spot treatment)
 - Carbon Filters
 - Reverse Osmosis
 - Softeners
 - Other systems
- Community system

Drinking Water Process

- Collaborate with citizens, MES, Corps, MDE, Cecil County Health Department, and other stakeholders to identify existing issues with local drinking water and potential solutions
- Timetable
- Consensus on solutions
