**Subject:** FW: Standard Chlorine of DE: 35% Design Acceptance  
**Date:** Friday, August 16, 2024 2:38:00 PM

---

Hi Ravi –

Please consider this email to be EPA's approval of the revised Preliminary Design for OU2. EPA and USACE reviewers have determined the comments made in the original submittal have been satisfactorily addressed. Any remaining open comments or questions can be addressed in subsequent submittals. Thanks to you and your team for addressing the comments and submitting the revised document.

**Subject:** Standard Chlorine of DE: 35% Design Acceptance

**Caution:** This email originated from outside EPA, please exercise additional caution when deciding whether to open attachments or click on provided links.

Kate and Brad, USACE would like to recommend acceptance of the 35% Design resubmission.

There are some open comments in Dr. Checks, but the overall team has recommended acceptance. This includes USACE Center of Excellence technical experts and the environmental/civil team from the district.

Thanks and please let me know any questions.
