Army Corps posts Public Notice regarding Land Transfer of Wilmington Harbor North Disposal Area to State of Delaware

PHILADELPHIA (March 22, 2023) – The U.S. Army Corps of Engineers Philadelphia District has posted a draft Environmental Assessment (EA) for the Land Transfer of the Wilmington Harbor North Disposal Area to the State of Delaware.

This EA evaluates the impacts associated with the Proposed Action of transferring a confined disposal facility (CDF) from the USACE to the Diamond State Port Corporation (DSPC), on behalf of the State of Delaware.

The Proposed Action includes the conveyance of approximately 172 acres of property from the USACE to the DSPC. This Property was identified as excess property due to economic infeasibility for USACE and therefore slated for conveyance to the State of Delaware in WRDA 2020, Section 356(d). Under this Proposed Action, no in-water work would take place. The Property would continue to be used as a CDF under DSPC ownership, and activities consistent with use of the Property as a dredge material disposal site would continue to occur.

Public and agency comments are requested by April 21, 2023. The draft Environmental Assessment and appendices are available at:
