USACE GUIDANCE FOR DEPLOYMENT OF EXPEDIENT FLOOD FIGHT PRODUCTS

Deployment

- Issuance of expedient flood fight products will be permitted only in emergencies declared by the District Engineer or designated representative and upon request from the State for assistance. This issue of these products should be focused on protection to critical infrastructure and key facilities.
- Supported district will coordinate directly with the host district for delivery of products to designated area. Provide type of product required, amount in LF, destination of shipment, and on-site USACE POC contact information to the host district.
- Supported districts will request Class 216 funds through the Division to fund technical assistance and supervision of the products issued to the local sponsor.
- Host districts will request Class 216 funds through the Division to fund transportation of materials to the impacted district's designated location.

of Engineers

USACE GUIDANCE FOR DEPLOYMENT OF EXPEDIENT FLOOD FIGHT PRODUCTS

Deployment (cont.)

- Supported district must provide and maintain a trained USACE representative on site with the public sponsor during the employment, operation, removal and repackaging process and provide technical assistance to the public sponsor for the use of the products.
- Deployment of vendor technical support will be coordinated directly with MVR EOC. MVR will request Class 216 funding to provide vendor technical services.
- Transportation of products from other regional stockpiles will be coordinated with HQUSACE prior to movement of the products.

of Engineers

USACE GUIDANCE FOR DEPLOYMENT OF EXPEDIENT FLOOD FIGHT PRODUCTS

Supported District Responsibilities

- Coordinate with host district for deployment of flood fight products.
- Hand receipt product to the public sponsor. The hand receipt must contain a statement similar to the recommended statement in EP 500-1-1, Paragraph 4-5 c. (1) with the addition that “Subsequent to the flood threat or event, the sponsor agrees to disassemble, clean, and re-palletize the product provided by the government.”
- Provide technical assistance to the public sponsor on the use of the product and manage and direct product vendor support if provided.
- Provide a trained USACE representative on site with the public sponsor during employment, operation, removal and repackaging process.
- Coordinate return shipment of the products to the host district after product use.

of Engineers

USACE GUIDANCE FOR DEPLOYMENT OF EXPEDIENT FLOOD FIGHT PRODUCTS

Host District Responsibilities

- Proper storage and maintenance of products while in storage.
- Prepare and deliver products as requested by impacted districts.
- Transport products from the deployed location back to the stockpile.
- Inspect products for re-usability prior to returning to the stockpile.

Public Sponsor Responsibilities

- Provide labor to assemble, operate, disassemble and repackage material issued.
- Provide necessary equipment and fill material to assemble the flood fight products.
- Sign hand receipt for responsibility of issued products.
