NAVIGABLE WATERS PROTECTION RULE**

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 9/3/2020

ORM Number: CENAP-OP-R-2020-00651

Associated JDs: N/A

Review Area Location¹: State/Territory: PA City: Forks Twp County/Parish/Borough: Northampton Co

Center Coordinates of Review Area: Latitude 40.766657 Longitude -75.177849

II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: The subject site was reviewed associated with the investigation of alleged unauthorized work within WOUS. As such, the investigation was limited only to those areas of recent work. Inspection of recent work revealed that no wetlands were present on the property and all work was performed outside of the nearby Delaware River. As such, the Corps has no geographic jurisdiction within the limit of investigation.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

B. Typical year assessment(s): [Use of the Corps' Antecedent Precipitation Tool determined, based on review of 30 years of prior precipitation, that the precipitation was above normal during the date of the inspection of this site. This site had a score of 16, when "normal" precipitation would require a score of 10-14.](#)

C. Additional comments to support AJD: [This JD is associated with the investigation of alleged unauthorized work. The investigation is limited to only those areas showing recent work. Waters and or](#)

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
