

U.S. ARMY CORPS OF ENGINEERS REGULATORY PROGRAM APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM) NAVIGABLE WATERS PROTECTION RULE

I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 5/1/2021

ORM Number: CENAP-OPR-2015-00492

Associated JDs: N/A

Review Area Location¹: State/Territory: PA City: Glenside County/Parish/Borough: Montgomery

Center Coordinates of Review Area: Latitude 40.100278 Longitude -75.183056

II. FINDINGS

A.	Summary: Check all that apply. At least one box from the following list MUST be selected.	Complete the
	corresponding sections/tables and summarize data sources.	

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- ☐ There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- ☐ There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

Unnamed Tributary to Wissahickon Creek	100	linear feet	. , , ,	The intermittent tributary on the property is highly incised from area stormflow caused by the development of the area and stormflow coming off of SR 309 but, according to the owner, runs dry during portions of normal years. Much of the normal base flow of this stream was cut off by impervious surfaces with the development of the residential
			typical year.	subdivision.

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

A. Select/enter all resources that were used to aid in this determination and attach data/maps to this

☐ USDA NRCS Soil Survey: Title(s) and/or date(s).

☐ USFWS NWI maps: Title(s) and/or date(s).

☐ USGS topographic maps: Title(s) and/or date(s).

Other data sources used to aid in this determination:

Data Source (select)	Name and/or date and other relevant information
USGS Sources	N/A.
USDA Sources	N/A.
NOAA Sources	N/A.
USACE Sources	N/A.
State/Local/Tribal Sources	N/A.
Other Sources	N/A.

B. Typical year assessment(s): No typical year assessment was performed due to the age of the original site inspection

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

C. Additional comments to support AJD: This JD was performed associated with the investigation of alleged unauthorized work on the subject property. Wetlands were identified in this location under the prior delineation, however, this work was performed prior to the adoption of the Regional Supplements to the Corps' 1987 Wetland Delineation Manual. Application of more recent methodologies resulted in the findings that the area on the subject parcel previously mapped as wetlands no longer met current indicators. As such, aside from the tributary stream identified above, the remainder of the property within the reviewed area was comprised entirely of uplands. However, waters and/or wetlands may be present outside the area of this limited investigation.
