This District has received an application for a Department of the Army (DA) permit pursuant to Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403) and Section 404 of the Clean Water Act (33 U.S.C. 1344).

The purpose of this notice is to solicit comments and recommendations from the public concerning issuance of a Department of the Army permit for the work described below.

**APPLICANT:** William Parsons (Dredge Harbor Yacht Basin, Inc.)

**AGENT:** S.T. Hudson Engineers, Inc.

**WATERWAY:** Dredge Harbor

**LOCATION:** 67 St. Mihiel Drive, Delran, Burlington County, New Jersey

**ACTIVITY:** Hydraulic maintenance dredge approximately 33,386 cubic yards of material to a depth of -4 MLW with 1-foot allowable over dredge from an approximately 6.07-acre area over a 10-year period (previously authorized on March 02, 2011 under DA Permit NAP-2009-00865). All resultant dredged material would be placed in uplands at the Amico Island confined disposal facility (CDF) as well as at two on-site CDFs. Dredged material would be transferred to the CDFs via pipeline from the hydraulic dredge. The dredge pipeline would be marked in accordance with U.S. Coast Guard regulations and would be floating; except at navigation channels where it would be submerged. Return water from each CDF would be discharged directly to the Dredge Harbor basin. The dredge material composition is >50% silt and clay.

See the **attached plans**, sheets 1 through 9, for additional project details.

**PURPOSE:** To meet the need to maintain navigable water depths at Dredge Harbor Boat Basin marina.

A preliminary review of this application indicates that species listed under the Endangered Species Act (ESA) or their critical habitat pursuant to Section 7 of the ESA as amended, may be present in the action area. This District will forward this Public Notice to the US Fish and Wildlife Service and/or NOAA Fisheries with a request for technical assistance on whether any ESA listed species or their critical habitat may be present in the area which would be affected by

the proposed activity. This District will evaluate the potential effects of the proposed actions on ESA listed species or their critical habitat and will consult with the US Fish and Wildlife Service and/or NOAA Fisheries as appropriate. ESA Section 7 consultation will be concluded prior to the final decision on this permit application.

The decision whether to issue a permit will be based on an evaluation of the activity's probable impact including its cumulative impacts on the public interest. The decision will reflect the national concern for both protection and utilization of important resources. The benefits which reasonably may be expected to accrue from the work must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the work will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs and welfare of the people. A Department of the Army permit will be granted unless the District Engineer determines that it would be contrary to the public interest.

The Corps of Engineers is soliciting comments from the public; Federal, State, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

Comments on the proposed work should be submitted electronically within 30 days to the District Engineer, U.S. Army Corps of Engineers, Philadelphia District at [PhiladelphiaDistrictRegulatory@usace.army.mil](mailto:PhiladelphiaDistrictRegulatory@usace.army.mil).

The USACE Cultural Resource Specialist is currently reviewing the proposed permit action for potential impacts to Historic Properties eligible for or listed on the National Register of Historic Places. A determination of effects will be coordinated with the State Historic Preservation Office, the Tribes and other consulting parties.

The Magnuson-Stevens Fishery Conservation and Management Act requires all federal agencies to consult with the NOAA Fisheries on all actions, or proposed actions, permitted, funded, or undertaken by the agency that may adversely affect Essential Fish Habitat (EFH). A preliminary review of this application indicates that EFH is present within the project area. The Philadelphia District will evaluate the potential effects of the proposed actions on EFH and will consult with NOAA Fisheries as appropriate. Consultation will be concluded prior to the final decision on this permit application.

Compensatory mitigation: In accordance with the June 9, 2008 U.S. Army Corps of Engineers and the U.S. Environmental Protection Agency Final Rule on Compensatory Mitigation for Losses of Aquatic Resources (33 CFR 325 and 332 and 40 CFR 230), the applicant has stated that the proposed project has been designed to avoid and minimize adverse effects on the aquatic environment to the maximum extent practicable. Information provided in the application and on plans indicates that there will be no discharge of fill material in waters of the United States and as such, compensatory mitigation is not proposed.

In accordance with Section 307(c) of the Coastal Zone Management Act of 1972, applicants for Federal Licenses or Permits to conduct an activity affecting land or water uses in a State's coastal zone must provide certification that the activity complies with the State's Coastal Zone Management Program. The applicant has stated that the proposed activity complies with and will be conducted in a manner that is consistent with the approved State Coastal Zone Management (CZM) Program. No permit will be issued until the State has concurred with the applicant's certification or has waived its right to do so. Comments concerning the impact of the proposed and/or existing activity on the State's coastal zone should be sent to this office, with a copy to the State's Office of Coastal Zone Management.

In accordance with Section 401 of the Clean Water Act, a Water Quality Certificate is necessary from the State government in which the work is located. Any comments concerning the work described above which relate to Water Quality considerations should be sent to this office with a copy to the State.

The evaluation of the impact of the work described above on the public interest will include application of the guidelines promulgated by the Administrator, U.S. Environmental Protection Agency, under authority of Section 404(b) of the Clean Water Act.

Any person may request, in writing, to the District Engineer, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for a public hearing shall state in writing, with particularity, the reasons for holding a public hearing.

Additional information concerning this permit application may be obtained by calling Kendall Miller at (215) 656-5873 or via email at [Kendall.L.Miller@usace.army.mil](mailto:Kendall.L.Miller@usace.army.mil).
