

# Regulatory Guidance Letter 92-01

## **SUBJECT: Federal Agencies Roles and Responsibilities**

**DATE: May 12, 1992**

**EXPIRES: December 31, 1997**

---

1. **PURPOSE:** The purpose of this guidance is to clarify the Army Corps of Engineers leadership and decision-making role as "project manager" for the evaluation of permit applications pursuant to Section 404 of the Clean Water Act (CWA) and Section 10 of the Rivers and Harbors Act. This guidance is also intended to encourage effective and efficient coordination among prospective permittees, the Corps, and the Federal resource agencies (i.e., Environmental Protection Agency (EPA), Fish and Wildlife Service (FWS), and National Marine Fisheries Service (NMFS)). Implementation of this guidance will help to streamline the permit process by minimizing delays and ensuring more timely decisions, while providing a meaningful opportunity for substantive input from all Federal agencies.

### **2. BACKGROUND:**

- a. The Department of the Army Regulatory Program must operate in an efficient manner in order to protect the aquatic environment and provide fair, equitable, and timely decisions to the regulated public. Clear leadership and a predictable decision-making framework will enhance the public acceptance of the program and allow the program to meet the important objective of effectively protecting the Nation's valuable aquatic resources.
- b. On August 9, 1991, the President announced a comprehensive plan for improving the protection of the Nation's wetlands. The plan seeks to balance two important objectives -- the protection, restoration, and creation of wetlands and the need for sustained economic growth and development. The plan, which is designed to slow and eventually stop the net loss of wetlands, includes measures that will improve and streamline the current wetlands regulatory system. This Regulatory Guidance Letter is issued in accordance with the President's plan for protecting wetlands.
- c. The intent of this guidance is to express clearly that the Corps is the decision-maker and project manager for the Department of Army's Regulatory Program. The Corps will consider, to the maximum extent possible, all timely, project-related comments from other Federal agencies when making regulatory decisions. Furthermore, the Corps and relevant Federal agencies will maintain and improve as necessary their working relationships.
- d. The Federal resource agencies have reviewed and concurred with this guidance and have agreed to act in accordance with these provisions. While this guidance does not restrict or impair the exercise of legal authorities vested in the Federal resource agencies or States under the CWA or other statutes and regulations (e.g., EPA's authority under section 404(c), section 404(f), and CWA geographic jurisdiction and FWS/NMFS authorities under the Fish and Wildlife Coordination

Act and the Endangered Species Act (ESA)), agency comments on Department of the Army permit applications must be consistent with the provisions contained in this regulatory guidance letter.

### **3. THE CORPS PROJECT MANAGEMENT/DECISION MAKING ROLE:**

- a. The Corps is solely responsible for making final permit decisions pursuant to section 10 and section 404(a), including final determinations of compliance with the Corps permit regulations, the Section 404(b)(1) Guidelines, and Section 7(a)(2) of the ESA. As such, the Corps will act as the project manager for the evaluation of all permit applications. The Corps will advise potential applicants of its role as the project manager and decision-maker. This guidance does not restrict EPA's authority to make determinations of compliance with the Guidelines in carrying out its responsibilities under Sections 309 and 404(c) of the Clean Water Act.
- b. As the project manager, the Corps is responsible for requesting and evaluating information concerning all permit applications. The Corps will obtain and utilize this information in a manner that moves, as rapidly as practical, the regulatory process towards a final permit decision. The Corps will not evaluate applications as a project opponent or advocate -- but instead will maintain an objective evaluation, fully considering all relevant factors.
- c. The Corps will fully consider other Federal agencies' project-related comments when determining compliance with the National Environmental Policy Act (NEPA), the Section 404(b)(1) Guidelines, the ESA, the National Historic Preservation Act, and other relevant statutes, regulations, and policies. The Corps will also fully consider the agencies' views when determining whether to issue the permit, to issue the permit with conditions and/or mitigation, or to deny the permit.

### **4. THE FEDERAL RESOURCE AGENCIES' ROLE:**

- a. It is recognized that the Federal resource agencies have an important role in the Department of the Army Regulatory Program under the CWA, NEPA, ESA, Magnuson Fisheries Conservation and Management Act, and other relevant statutes.
- b. When providing comments, Federal resource agencies will submit to the Corps only substantive, project-related information on the impacts of activities being evaluated by the Corps and appropriate and practicable measures to mitigate adverse impacts. The comments will be submitted within the time frames established in interagency agreements and regulations. Federal resource agencies will limit their comments to their respective areas of expertise and authority to avoid duplication with the Corps and other agencies and to provide the Corps with a sound basis for making permit decisions. The Federal resource agencies should not submit comments that attempt to interpret the Corps regulations or for the purposes of section 404(a) make determinations concerning compliance with the Section 404(b)(1) Guidelines. Pursuant to its authority under Section 404(b)(1) of

the CWA, the EPA may provide comments to the Corps identifying its views regarding compliance with the Guidelines. While the Corps will fully consider and utilize agency comments, the final decision regarding the permit application, including a determination of compliance with the Guidelines, rests solely with the Corps.

## **5. PRE-APPLICATION CONSULTATION:**

- a. To provide potential applicants with the maximum degree of relevant information at an early phase of project planning, the Corps will increase its efforts to encourage pre-application consultations in accordance with regulations at 33 CFR 325.1(b). Furthermore, while encouraging pre-application consultation, the Corps will emphasize the need for early consultation concerning mitigation requirements, if impacts to aquatic resources may occur. The Corps is responsible for initiating, coordinating, and conducting pre-application consultations and other discussions and meetings with applicants regarding Department of the Army permits. This may not apply in instances where the consultation is associated with the review of a separate permit or license required from another Federal agency (e.g., the Federal Energy Regulatory Commission or the Nuclear Regulatory Commission) or in situations where resource agencies perform work for others outside the context of a specific Department of the Army permit application (e.g., the Conservation Reserve Program and technical assistance to applicants of Federal grants).
- b. For those pre-application consultations involving activities that may result in impacts to aquatic resources, the Corps will provide EPA, FWS, NMFS (as appropriate), and other appropriate Federal and State agencies, a reasonable opportunity to participate in the pre-application process. The invited agencies will participate to the maximum extent possible in the pre-application consultation, since this is generally the best time to consider alternatives for avoiding or reducing adverse impacts. To the extent practical, the Corps and the Federal resource agencies will develop local procedures (e.g., teleconferencing) to promote reasonable and effective pre-application consultations within the logistical constraints of all affected parties.

## **6. APPLICATIONS FOR INDIVIDUAL PERMITS:**

- a. The Corps is responsible for determining the need for, and the coordination of, interagency meetings, requests for information, and other interactions between permit applicants and the Federal Government. In this regard, Federal resource agencies will contact the Corps to discuss and coordinate any additional need for information from the applicant. The Corps will cooperate with the Federal resource agencies to ensure, to the extent practical, that information necessary for the agencies to carry out their responsibilities is obtained. If it is determined by the Corps that an applicant meeting is necessary for the exchange of information with a Federal resource agency and the Corps chooses not to participate in such a meeting, the Federal resource agency will apprise the Corps, generally in writing,

- of that agency's discussions with the applicant. Notwithstanding such meetings, the Corps is solely responsible for permit requirements, including mitigation and other conditions -- the Federal resource agencies must not represent their views as regulatory requirements. In circumstances where the Corps meets with the applicant and develops information that will affect the permit decision, the Corps will apprise the Federal resource agencies of such information.
- b. Consistent with 33 CFR 325, the Corps will ensure that public notices contain sufficient information to facilitate the timely submittal of project-specific comments from the Federal resource agencies. The resource agencies comments will provide specific information and/or data related to the proposed project site. The Corps will fully consider comments regarding the site from a watershed or landscape scale, including an evaluation of potential cumulative and secondary impacts.
  - c. The Corps must consider cumulative impacts in reaching permit decisions. In addition to the Corps own expertise and experience, the Corps will fully consider comments from the Federal resource agencies, which can provide valuable information on cumulative impacts. Interested Federal agencies are encouraged to provide periodically to the Corps generic comments and assessments of impacts (outside the context of a specific permit application) on issues within the agencies' area of expertise.

## **7. GENERAL PERMITS:**

- a. The Corps is responsible for proposing potential general permits, assessing impacts of and comments on proposed general permits, and deciding whether to issue general permits. The Corps will consider proposals for general permits from other sources, including the Federal resource agencies, although the final decision regarding the need to propose a general permit rests with the Corps. Other interested Federal agencies should provide comments to the Corps on proposed general permits. These Federal agency comments will be submitted consistent with established agreements and regulations and will focus on the Federal agencies' area(s) of expertise. The Corps will fully consider such agencies' comments in deciding whether to issue general permits, including programmatic general permits.
- b. The Corps is responsible for initiating and conducting meetings that may be necessary in developing and evaluating potential general permits. Any discussions with a State or local Government regarding proposed programmatic general permits will be coordinated through and conducted by the Corps. Prior to issuing a programmatic general permit, the Corps will ensure that the State or local program, by itself or with appropriate conditions, will protect the aquatic environment, including wetlands, to the level required by the section 404 program.

8. This guidance expires 31 December 1997 unless sooner revised or rescinded.

FOR THE COMMANDER:

ARTHUR E. WILLIAMS  
Major General, USA  
Director of Civil Works
