REGULATORY BRANCH

Reference is made to Department of the Army Delaware State Program General Permit 18 (SPGP-18) authorizing the construction of structures, work, and the discharge of dredged and fill material in substantially developed artificial tidal lagoons in the State of Delaware.

Notice is hereby given that, on January 24, 2018, the United States Army Corps of Engineers, Philadelphia District modified and reauthorized SPGP-18. The modification and reauthorization of this Department of the Army general permit has been conducted under the statutory authority of Section 10 of the River and Harbor Act of 1899 and Section 404 of the Clean Water Act.

This general permit has been developed for certain categories of structures and work and the discharge of dredged and fill material in waters of the U.S. that require Department of the Army and State of Delaware authorizations. Activities typically authorized by SPGP-18 include work and structures such as bulkheads, breakwaters, piers, docks, pilings, rip-rap, dredging and filling, etc. The revalidation and extension of SPGP-18 was coordinated with other interested Federal agencies, the State of Delaware, and the general public. The full text of the reauthorization of SPGP-18 is attached to this notice.

The reauthorization of SPGP-18 will remain in effect until the general permit expires on December 31, 2022. At that time, SPGP-18 may be re-issued/extended. In the event that SPGP-18 is modified, any activity which has been authorized under the terms and conditions of SPGP-18 will remain authorized until such time that the required State permit/authorization issued with the SPGP-18 expires, provided the authorized activity complies with any subsequent re-authorization or modification of SPGP-18.
